Department C - Quilt Quest**Division 229 - Quilt Quest****Pay Category #3**

In Quilt Quest, 4-H'ers learn skills as they progress through the project. The least experienced 4-H exhibitor will select fabric, cut, and sew together only squares or rectangles in making the quilt top. They may have additional guidance in piecing the quilt block and layering together the quilt top, inner batting and the quilt bottom. Another person can do the quilting for them.

In the Premier class, the 4-H'er has developed skills to be able to do all of the work by himself/herself. This includes pattern and fabric selection, cutting and sewing individual pieces, layering the quilt top/batting/backing together, and quilting. Quilting may be done by hand, by sewing machine or by a commercial-grade quilting machine. After quilting, the 4-H'er must finish the quilt by "squaring it up," put binding on the edge, and placing a label on the quilt which provides details about the quilt making process for historical purposes. .

Supporting information is required for this exhibit. Information must also include elements or principles of design used and steps taken to complete project. Please note this is in the [Home Design & Restoration information sheet](#). Exhibits without [supporting information](#) will be dropped a ribbon placing.

All entry cards and support information must be attached using a safety pin. **No straight pins.**

When judging Quilt Quest exhibits, the judges consider SF209 "Standards for Judging Quilts and Quilted Items."

For all classes, 4-H'ers can choose fabrics for the quilt by selecting fabric from fabric bolts. 4-H'ers may also use "fabric collections" offered by manufacturers in a particular designer or fabric line. Examples of fabric collections include:

- **Jelly Rolls** are made of (up to) 40 different strips of 2 ½" wide fabric laying on top of one another and rolled up to look like a jelly roll. The fabric is created by one designer or fabric line and compliments each other. In many cases, less skilled 4-H'ers find it difficult to cut narrow strips with a rotary cutter and ruler, so this fabric selection may make it easier as they learn.
- **Honey Buns** are made like the Jelly Rolls with 1 ½" strips of fabrics.
- **Layer Cakes** are 10" squares of fabric from a manufactured designer or fabric line with different pieces of fabric "layered" on top of one another to look like a piece of cake.
- **Charm Packs** are made of 5" squares of coordinating fabric and may be tied up with a string or scrap of fabric.
- **Turnover** is a collection of coordinating fabrics that are cut into 6" triangles.
- **Fat Quarters** are ½ yard cuts of fabric which are cut in half to make a rectangle that is approximately 18" x 21". (One half yard of fabric yields 2 fat quarters). The "fat quarter" can be more economical to purchase for a smaller quilt because the purchaser does not have to buy the entire yardage width.
- **Fabric Kit** is a collection of fabrics cut in large pieces to accommodate the requirements of a particular quilt pattern. The 4-H'er must cut out all of the smaller squares, rectangles, etc. to make the quilt top according to the pattern directions.

After fabric selection, youth can use a variety of tools for cutting the fabric and completing the quilt. Cutting into pattern pieces may include hand roller die cutting machines that cut particular shapes which can be applied to fabric. This is allowed in the construction of the quilt.

A quilted exhibit is made up of at least 3 layers. Quilts or quilted items must be quilted or tied through all layers. Fleece blankets are not eligible in this division. Quilts must have a permanent label on the back in the bottom-right corner with quilter's name and date of completion.

- C-229-010 **Exploring Quilts** - Illustrate some aspect of quilts or quilt making. Examples include, but are not limited to, language arts, quilts of different cultures, chemistry, design, preservation, history, construction, math-conversion of quilt patterns, textiles/fabrics, computerization, and entrepreneurship. History may include history of an old quilt or history/research of a particular style of quilt such as Baltimore album quilts or Amish quilts. Exhibit may be a 14 x 22 inch poster, notebook, CD, PowerPoint, Prezi, DVD, YouTube, or other technique. All items in an exhibit must be attached together and labeled. NO quilted items should be entered in this class. SF208C Scoresheet for Education Exhibits and Computer Exploration. SF208C

SF208C

Example to attach to your exhibit
<p>Name: Chris Clover</p> <p>County: Clover County</p> <p>Age: 10</p> <p>Field Experience, Study, or Observations:</p> <p>I attended a 4-H workshop where we put out a food plot, and then made turkey calls. We played a game about attracting turkeys. Sometimes we acted like a female to draw in a tom turkey. Sometimes we acted like a lost baby turkey to call in a whole flock. I was able to use my turkey call and play the game successfully. While I never turkey hunted in person, I went on-line to research more turkey calls. I hope to turkey hunt someday, and I want to use a box call to hunt fall turkeys.</p> <p>Credits/Source:</p> <p>Information was obtained from Nebraska Game & Parks website</p>

Department D – Forestry

Environmental Education & Earth Sciences

General Information

The official reference for all forestry projects is the Tree Identification Manual (4-H 332), which was recently revised and is available for purchase from UNL Marketplace (<http://marketplace.unl.edu/ne4h/tree-identification-manual-691.html>). Other helpful forestry references include Trees of Nebraska (EC 92-1774-X), Leafing Out (4-H431) and Plant a Tree (EC 17-11-80).

Display "boards" must be made from wood or wood composite, e.g. plywood, fiberboard, or Masonite, 1/4" to ½" thick and no larger than 24" x 24". Display boards may be coated, e.g., painted or varnished, on both sides to prevent warping.

Display "posters" must be made from a material, e.g. foam board or poster board that will stand upright without buckling, and be no larger than 24" x 24".

Display "books" must measure no more than 16" x 16".

At least 5 of the 10 samples in Class 2, 3, 4, and 5 must be from the list of 60 species described in 4-H 332. Samples must be from 10 different tree species. For example, Emerald Queen Maple and Crimson King Maple are both varieties of the same species (Norway Maple), and thus have the same genus and species name, i.e. Acer platanoides. All samples must be from trees. NO shrubs. If more than 10 samples are included in the display, only the first 10 samples from the current year will be judged.

Due to emerald ash borer infestation, no true ash species (Green Ash, White Ash, Black Ash, or Blue Ash) may be included in any collections. Inclusion of a true ash species will result of the project being disqualified.

Remember that other general labeling standards apply. For example, scientific names are always italicized or underlined. Also, the first letter of a Genus name is always capitalized. The first letter of a species name is always lower case. When required, always indicate complete scientific names (Genus and species) and common names, (e.g. Norway Maple) even when "variety names" are included. For example, the scientific name of Emerald Queen Maple is Acer platanoides and the common name is Norway maple. "Emerald Queen" may be included as the variety name, but variety names are not required.

Another important judging factor is how well the exhibitor follows the written directions is an important factor in judging.

Classes:

Division 320- FORESTRY

Pay Category #4

- D-320-001 **Design-Your-Own Exhibit** – Prepare an educational exhibit about some aspect of trees, forests or forestry that is of special interest to you. Possible topics include paper recycling, wild fire, forest products, forest wildlife, or forest pests. The only requirement is that the display must be no larger than 24"x24"x24". Photographs, drawing, samples, charts, posters, etc. can be used but include enough information to adequately explain the topic. Your display should be substantially different from other display classes. Be as creative as you like. SF31
- D-320-002 **Leaf Display** – The leaf display must include samples of "complete leaves" from at least 10 different tree species. The display must include at least two samples of simple leaves, compound leaves, and conifer leaves. Leaves should be pressed, dried and mounted. SF32

Collection: Whenever possible, collect leaves from mature trees. Collect leaves any time after they have reached full size, usually beginning in early summer. Leaf samples should be in good condition and representative of the average leaves on the tree. Keep in mind that shaded leaves often are much larger than normal. Carefully remove leaves from the twig with the entire petiole or rachis (if compound) intact. After collection, fresh leaf samples can be temporarily stored within the pages of an old magazine, but they should be properly pressed and dried for display. Be sure to record pertinent information during collection. All collection must be done by the exhibitor.

Mounting: Leaves may be displayed in a notebook or on a display board. Any method may be used to mount leaves, e.g. wire, glue, tape, staples, plastic bags, but be sure all their features can be clearly identified.

Labeling: The label for each sample must include:

- | | |
|---|---|
| 1. Common Name | 6. Collector's Name |
| 2. Scientific Name | 7. Collection Date |
| 3. Leaf Type | 8. Collection Location (be specific, state and county at a minimum) |
| 4. Leaf Arrangement | |
| 5. Leaf Composition (for broadleaf trees) | |

If a twig is included with a sample, indicate "twig included" on the label. For example, the twig may be included with an Easter red cedar sample because the leaves are very small and difficult to remove from the twig. Supplemental information, e.g. general uses, common products, fall color, etc., may be included with the display to enhance its educational value.

D-320-003 Twig Display – The twig display must include twig samples from at least 10 different tree species. The display must include at least two samples of opposite and alternate leaf arrangements from broadleaf trees. SF33

Collection: Twig samples should be collected during the dormant season (November-April) when the buds are mature. Twig samples must be at least 6 inches long and exhibit buds. Leaves must be removed and side branches must be trimmed to less than 1 inch in length. All collection must be done by the 4-H member.

Mounting: Twigs must be mounted on a display board. Any method, e.g. wire, glue, tape, staples, plastic bags, may be used to mount twigs, but be sure all features can be clearly identified. The non-terminal end must be cut at a slant so the pith can be seen.

Labeling: The label for each sample must include:

- | | |
|---|---|
| 1. Common Name | 5. Collection Date |
| 2. Scientific Name | 6. Collection Location (be specific, state and county at a minimum) |
| 3. Leaf arrangement (for broadleaf trees) | |
| 4. Collector's Name | |

Supplemental information, e.g. General uses, tree characteristics, etc., may be included with the display to enhance its educational value.

D-320-004 Seed Display – The seed display must include seed samples from at least 10 different tree species. SF34

Collection: Tree seeds should be collected at the time of year when they mature, which varies widely depending upon tree species. For example, Silver maple seeds mature in May while red oak acorns do not mature until September. Remember to display the seeds, and not the fruit. For example, the seed of honey locust is enclosed in a pod. Remove and display the seed, not just the pod. It is acceptable to display the fruit with the seed, but clearly label each. All collection must be done by the 4-H member.

Mounting: Seeds may be displayed in a variety of ways, e.g. mounted on a display board, displayed in jars in a rack, etc., but they must be securely mounted and easily viewed. Be as creative as you like.

Labeling: The label for each sample must include:

- | | |
|--|---|
| 1. Common Name | 4. Collector's Name |
| 2. Scientific Name | 5. Collection Date |
| 3. Type of fruit, if known (e.g.-samara, pod, nut, legume, etc.) | 6. Collection Location (be specific, state and county at a minimum) |

Supplemental information, e.g. maturity date, average number of seed in the fruit, etc., may be included with the display to enhance its educational value.

D-320-005 Wood Display – The wood display must include wood samples from at least 10 different tree species. SF36

Preparation: Samples may be of any shape, e.g. sections from a board, wood cylinders turned on a lathe, horizontal or vertical cross sections of a small log with bark attached, etc., but all samples should be the same shape, e.g. all wood cylinders or all sections of a board. Each sample can be no larger than 4"x4"x4". Cut surfaces should be sanded to show the grain. Treating samples with a clear finish (no stain) is optional. All collection must be done by the 4-H member.

Mounting: Samples may be displayed in a variety of ways but they must be securely mounted and easily viewed. For example, wood samples may be mounted on a display board or displayed in a box or rack. Be as creative as you like.

Labeling: The label for each sample must include:

- | | |
|-------------------------------------|---|
| 1. Common Name | 5. Collection Date |
| 2. Scientific Name | 6. Collection Location (be specific, state and county at a minimum) |
| 3. Wood Type (softwood or hardwood) | |
| 4. Collector's Name | |

Supplemental information, e.g. common products, density, etc. may be included with the display to enhance its educational value.

D-320-006 Cross Section- Display a disc cut from a tree species listed in 4H332. The sample must be collected, by the 4-H member, within one year of the state fair judging day. The disc must measure 6 to 12 inches in diameter and 1 to 3 inches thick. The bark should be firmly attached, which may be difficult if the tree was dead when the disc was cut. Sand at least one side of the disc so the grain can be easily seen. If the disc is treated with a clear finish, both sides must be treated to minimize warping. Some cracking or checking can be expected and is allowed. SF38

Labeling: The following parts must be clearly and accurately labeled on the cross section with pins, paper tags, or some other form of identification.

- | | | |
|--------------|----------------------------------|------------|
| A. Pith | C. Sapwood | E. Cambium |
| B. Heartwood | D. One growth ring (begin & end) | F. Bark |

A separate label attached to the back of the disc must include:

- | | |
|---|--|
| 1. Common Name | 5. Collector's Name |
| 2. Scientific Name | 6. Collection Date |
| 3. Tree Classification (softwood or hardwood) | 7. Collection Location (state and county at a minimum) |
| 4. Age (of the cross section) | |

D-320-007 Parts of a Tree – This project is only for ages 8-11. Prepare a poster, no larger than 24 inches x 24 inches that clearly identifies the main external parts of any tree. SF39

- | | |
|-----------|------------|
| a) Trunk | e) Flowers |
| b) Crown | f) Fruit |
| c) Roots | g) Buds |
| d) Leaves | h) Bark |

Identifying other internal parts, e.g. phloem, xylem, cambium, annual, ring, pith, etc., is optional. Attach a separate label on the back of the poster that includes the 4-H member's name and age.

D-320-008 Living Tree - Display a living tree seedling grown by the exhibitor from seed in the display container. The seed must be from a species listed in 4H332. The seedling must be 60 days to 1 year old (on State Fair judging day). The display container must contain at least 8 inches of soil (potting mix or suitable natural soil); have drainage hole(s), and a drain pan to catch drainage water. SF40

Labeling: A waterproof label must be attached and include:

- | | |
|-----------------------------|---------------------|
| 1. Common Name | 4. Planting Date |
| 2. Scientific Name | 5. Emergence Date |
| 3. Seed Treatments (if any) | 6. Exhibitor's Name |

Supplemental information about the tree, e.g. where the seed was collected, growth measurements, uses for that species, etc., may be included in an attached notebook, poster, etc. Supplemental information will be an important factor in judging.

D320009 Forest Product Display - Prepare a visual display and/or collection tracing the origin of one non-lumber product that comes from trees and/or forests. The display must be no larger than 24 inches by 22 inches by 28 inches. Photographs, drawings, samples, charts, posters, etc. can be used. Posters submitted may be no larger than 22" x 28" and may be either vertical or horizontal. The contestant must identify what species of tree the product is derived from and where the product is harvested, grown, or otherwise collected. The product listed must be partially or fully derived from trees, if partial the approximate percentage should be articulated in the display.

- The goal of this exhibit is for students to learn that many products come from trees and forests and to explore one of these products through in-depth study.
- Information about the tree or forest product: e.g. information about harvesting, processing, industry information, and environmental or other benefits may be included to enhance educational value. Supplemental information will be an important factor in judging but should not exceed three printed pages of text. Cite sources of information.

Strategies articulated in the poster can include personal and/or land management actions. Attach a separate label on the back of the poster that includes the 4-H member's name and age.

- Supplemental information about wildfire prevention should be attached to the poster: e.g. frequency of wildfires in Nebraska/United States, financial costs of wildfires, environmental factors that contribute to wildfires, etc. to enhance educational value. Supplemental information will be an important factor in judging but should not exceed three printed pages of text. Cite sources of information

D320012 Sustainable Landscape Diorama - Box must be no larger than 24" x 24". The exhibit must show a Nebraska landscape that includes elements such as windbreaks, fields, pastureland, CRP, public lands, community/municipal landscapes. The goal of this exhibit is for students to articulate conservation and sustainability best-practices that can be implemented on a landscape, while addressing landowner and other stakeholder interests.

- Label point/nonpoint sources of pollution, carbon sequestration, water-wise practices, wildfire prevention strategies, renewable energy sources, and other conservation practices as well as at least 10 species of plants included in the diorama.

DEPARTMENT G - ANIMALS

NATIONAL CODE OF SHOW RING ETHICS – IAFE (International Association of Fairs and Expositions)

Exhibitors of animals at livestock shows shall at all times deport themselves with honesty and good sportsmanship. Their conduct in this competitive environment shall always reflect the highest standards of honor and dignity to promote the advancement of agricultural education. This code applies to all junior as well as open class exhibitors who compete in structured classes of competition. This code applies to all livestock offered in any event at a livestock show. In addition to the "IAFE National Code of Show Ring Ethics," fairs and livestock shows may have rules and regulations which they impose on the local, county, state, provincial and national levels.

All youth leaders working with junior exhibitors are under an affirmative responsibility to do more that avoid improper conduct or questionable acts. Their moral values must be so certain and positive that those younger and more pliable will be influenced by their fine example. Owners, exhibitors, fitters, trainers and absolutely responsible persons who violate the code of ethics will forfeit premiums, awards and auction proceeds and shall be prohibited from future exhibition in accordance with the rules adopted by the respective fairs and livestock shows. Exhibitors who violate this code of ethics demean the integrity of all livestock exhibitors and should be prohibited from competition at all livestock shows in the United States and Canada.

The following is a list of guidelines for all exhibitors and all livestock in competitive events:

1. All exhibitors must present, upon request of fair and livestock show officials, proof of ownership, length of ownership and age of all animals entered. Misrepresentation of ownership, age, or any facts relating thereto is prohibited.
2. Owners, exhibitors, fitters, trainers, or absolutely responsible persons shall provide animal health certificates from licensed veterinarians upon request by fair or livestock show officials.
3. Junior exhibitors are expected to care for and groom their animals while at fairs or livestock shows.
4. Animals shall be presented to show events where they will enter the food chain free of volatile drug residues. The act of entering an animal in a livestock show is the giving of consent by the owner, exhibitor, fitter, trainer and/or absolutely responsible person for show management to obtain any specimens of urine, saliva, blood, or other substances from the animal to be used in testing. Animals not entered in an event which culminates with the animal entering the food chain shall not be administered drugs other than in accordance with applicable federal, state and provincial statutes, regulations and rules. Livestock shall not be exhibited if the drugs administered in accordance with the federal, state, provincial statutes, regulations and rules affect the animal's performance or appearance at the event. If the laboratory report of the analysis of saliva, urine, blood, or other sample taken from livestock indicates the presence of forbidden drugs or medication, this shall be prima facie evidence such substance has been administered to the animal either internally or externally. It is presumed that the sample of urine, saliva, blood, or other substance tested by the laboratory to which it is sent is the one taken from the animal in question, its integrity is preserved and all procedures of said collection and preservation, transfer to the laboratory and analysis of the sample are correct and accurate and the report received from the laboratory pertains to the sample taken from the animal in question and correctly reflects the condition of the animal at the time the sample was taken, with the burden on the owner, exhibitor, fitter, trainer, or absolutely responsible person to prove otherwise. At any time after an animal arrives on the fair or livestock show premises, all treatments involving the use of drugs and/or medications for the sole purpose of protecting the health of the animal shall be administered by a licensed veterinarian.
5. Any surgical procedure or injection of any foreign substance or drug or the external application of any substance (irritant, counterirritant, or similar substance) which could affect the animal's performance or alter its natural contour, conformation, or

- appearance, except external applications of substances hoofs or horns of animals which affect appearance only and except for surgical procedures performed by a duly licensed veterinarian for the sole purpose of protecting the health of animal, is prohibited.
6. The use of showing and/or handling practices or devices such as striking animals to cause swelling, using electrical contrivance, or other similar practices are not acceptable and are prohibited.
 7. Direct criticism or interference with the judge, fair or livestock show management, other exhibitors, breed representatives, or show officials before during, or after the competitive event is prohibited. In the furtherance of their official duty, all judges, fair and livestock show management, or other show officials shall be treated with courtesy, cooperation and respect and no person shall direct abusive or threatening conduct toward them.
 8. No owner, exhibitor, fitter, trainer, or absolutely responsible person shall conspire with another person or persons to intentionally violate this code of ethics or knowingly contribute or cooperate with another person or persons either by affirmative action or inaction to violate this code of ethics. Violation of this rule shall subject such individual to disciplinary action.
 9. The application of the code of ethics provides for absolute responsibility for an animal's condition by any owner, exhibitor, fitter, trainer, or participant whether or not he or she was actually instrumental in or had actual knowledge or the treatment of the animal in contravention of this code of ethics.
 10. The act of entering an animal is the giving of consent by the owner, exhibitor, fitter, trainer, or absolutely responsible person to have disciplinary action taken by the fair or livestock show for violation of this Code of Show Ring Ethics and any other rules of competition of the fair or livestock show without recourse against the fair or livestock show. The act of entering an animal is the giving of consent that any proceedings or disciplinary action taken by the fair or livestock show may be published with the name or the violator or violators in any publication of the International Association of Fairs and Expositions, including Fairs and Expositions and any special notices to members.
 11. The act of entering of an animal in a fair or livestock show is the giving of verification by the owner, exhibitor, fitter, trainer, or absolutely responsible person that he or she has read the IAFE National Code of Show Ring Ethics and understands the consequences and penalties provided for actions prohibited by the code. It is further a consent that any action which contravenes these rules and is also in violation of federal, state, or provincial statutes, regulations, or rules may be released to appropriate law enforcement authorities with jurisdiction over such infractions.

CLOVER KID LIVESTOCK (4-H Policy Handbook)

Animals and animal subject matter can contribute to Clover Kids objectives. However, for safety, liability, and competitive reasons often associated with livestock shows, some restrictions are necessary to maintain Clover Kids program objectives. The Clover Kids program will be developmentally appropriate and involve the following components:

Encourage involvement of parent or significant adult.

- Focus on self-esteem and provide positive feedback.
- Foster the development of life skills that are essential for the cognitive, social, emotional and physical maturation of youth by providing a unique educational opportunity.
- Share through cooperative learning.
- Noncompetitive — emphasizing fun and success of every child.
- Programs are activity-focused and not project focused.
- Recognize individuals for participation.
- Present recognition and incentives without rank or placing

Specific reasons for being cautious with direct large animal involvement are as follows:

Children eight and under often lack the mental and physical skills for controlling and understanding the strength of large animals (Livestock Conservation Institute, 1994).

Young children may lack the strength, balance, and attention span to adequately manage large animals (American Medical Equestrian Association, 1993).

Because of these reasons, Clover Kids programs involving live animals must adhere to the following:

- Exhibition includes discussions with youth based on their knowledge of the care and raising of the animal.
- Exhibitors show in a non-competitive setting for participation only.
- Age, size, and temperament of animal projects must be appropriate for the exhibitor's age and size.
- Horse projects are not allowed or appropriate. Beef animals weighing more than 350 pounds at time of show are not allowed or appropriate for this age group either.
- Animals that are appropriate for this age group include bucket calf, sheep, swine, goat, dog, poultry, rabbit, cat, and companion animals.
- There will be one adult/teen volunteer present with each Clover Kid member that is handling or exhibiting animals. This applies to all animal projects.
- Allowable animals should be no more than six months of age and no more than 350 pounds at time of show. Exhibitors in this age group are not allowed to sell their animal through a livestock sale or premium auction.

HERDSMANSHIP

Butler County Fair

Livestock exhibitors at the Butler County Fair are expected to keep their quarters orderly, neat, and as attractive as possible. The total area will be inspected two or three times each day. Each club will be rated on its herdsmanship. Final herdsmanship placings for each club will be based on herdsmanship rating of all beef, sheep, swine, goat, and horses exhibited at the Butler County Fair. Remember that parents should assist in herdsmanship only when absolutely necessary. Herdsmanship will be judged on Thursday, Friday, Saturday, and Sunday (morning only). The Herdsmanship Award will be presented on Sunday during the subsidy auction.

Herdsmanship will be judged daily, for each specie, on the basis of:

- | | |
|---|---------|
| 1. Stall Cards in Place. Ribbon stickers on after the show. | 10 pts. |
| 2. Aisles clean and free of manure, straw, equipment, etc.; Wet straw & Manure placed in appropriate receptacle. | 30 pts. |

Total per day, per specie	100 pts.
---------------------------	----------

*Accumulative fair total possible, 2000 points.

*Additional points will be awarded for participation in the county fair exhibit hall set-up and/or fairgrounds clean-up days. The number of club members who attend will be taken into a percentage compared to the total number of members in the club. 100 pts.

ROUND ROBIN SHOWMANSHIP

The grand champion senior showmen in Beef, Swine, Horse, Sheep, Goats, Rabbits and Poultry are eligible to compete for the round robin showmanship championship. An individual is eligible to show in only one species. If qualified in more than one, he/she must choose which one species to show. The reserve champion showman, if also a purple winner, is the only alternate. Winner will be eligible for future species showmanship contests, but not the round robin.

Exhibitors will bring their own animal to the contest; their entry signifies permission for the other champions to show that animal in this contest. Exhibitors will be judged on their knowledge of each species shown and the specific showmanship skills required as well as their presentation of each species. They will be judged on the appearance or fitting of their own animal only.

There is no premium money for this contest. The grand and reserve champions will receive a special award.

Educational Display for Animal Entries**Pay Category #3**

4-H'ers are invited to create a poster highlighting an educational aspect of their animal project. The poster could focus on a current livestock issue, animal industry career, animal care or health, economic impacts of the livestock industry, within the species of dairy, beef, sheep, swine, goat, poultry, and rabbit. Posters will be displayed in the entrance of the livestock buildings as a way to increase the educational experiences of both the 4-H member and the general public increasing agricultural literacy and promoting good will at the Nebraska State Fair. During the time when the corresponding animal is not stalled on the fairgrounds, the poster will be displayed in the 4-H Exhibit Building. In order to be eligible for the State Fair, posters must have been exhibited at the county fair and received a purple ribbon. Because posters may have been exhibited at the county fair in outside conditions, it is understood that they may be re-done prior to Nebraska State Fair but the content and design should be similar

A. State Fair Eligible Entries are limited to those that reference species that stall on the fairgrounds during the Nebraska State Fair.

Species include dairy, beef, sheep, swine, goat, poultry and rabbit. (Horse, small animal and dog posters are judged for County display only.)

B. State Fair selected entries will be registered by county office staff and entered during the static entry day at the Nebraska State Fair.

C. Posters will be judged on static entry day of the State Fair when other static exhibits are judged.

D. Posters will be displayed in the respective barns based on the focus of the exhibit. Educational display superintendents will display posters and they will be in place throughout the weekend of their respective exhibition at the Nebraska State Fair.

E. Poster display should be sturdy enough to last through the fair and no larger than 22 x 28 inches. Only standard poster board will be accepted. Foam Board or cardboard posters are discouraged. NOTE: Please take into consideration that these exhibits will be displayed inside the barns and may not be returned to the exhibitor in the original condition at the time of entry.

G. All entries must match the specie of livestock they have entered at EITHER the county fair OR in the Nebraska State Fair. For example, if a 4-H'er is exhibiting beef, their entry must be about beef and not another species. Also a 4-H'er is NOT required to exhibit their livestock/animal entry at the State Fair. The entry just needs to match the species that was exhibited at the county level.

H. Posters will be judged. Refer to scoresheet for this exhibit.

Its design was modified multiple times, please indicate what change was made with each modification, and what prompted the need for the change. i.e. I printed it and the design was too fragile, so I resliced the print to make thicker external walls, or to have a denser infill.
 3. Define your process for designing/printing. What software and/or hardware was used (indicate type of 3D printer or if item was created with 3D pen)?
 4. What materials were selected for your project?
 5. If your final design has any moving parts, define how you determined appropriate allowance in your design.
 6. Identify any changes that you would make to improve your design.

Department H, Division 920 – STEM Welding

Pay Category #3

- H-920-001 **Welding Joints** – (SF281) display of one butt, one lap and one fillet weld
1. All welds should be made with the same electrode/wire/rod size and number.
 2. Welds should be made only on one side of metal so penetration can be judged.
 3. Welds should be cleaned with a chipping hammer and wire brush. Apply a coat of light oil (penetrating oil) to the metal to prevent rusting. Wipe off excess oil.
 4. It is suggested that all welds be of the same size and thickness as metal. These pieces, referred to as coupons, should be 1 ½ to 2 inches wide and 3 ½ to 4 inches long. A good way to get this size is to buy a new cold rolled strap iron and cut it to length. The extra width is needed to provide enough metal to absorb the heat from the welding process and prevent the coupons from becoming too hot before the bead is completed. Narrower coupons will become very hot, making an average welder setting too cold at the bead start, just about right in the middle, and too hot at the end. The correct way to weld narrow strips is to make short beads and allow time to cool, however this project requires a full-length bead.
 5. Stick welding: Suggested coupon thickness - ¼ inch if using 1/8 inch rod. Suggested rod-AC and DC straight or reverse polarity- first E-7014, second E-6013
 6. MIG welding: Suggested coupon thickness - ¼ inch if using .035 wire and 1/8 inch if using .023 wire
 7. Oxy-Acetylene: Suggested coupon thickness –1/8-inch. Suggested rod 1/8-inch mild steel rod
- H-920-002 **Position Welds** - (SF281) - display showing three beads welded in the vertical down, horizontal and overhead positions.
1. It is suggested that all welds be of the same size and thickness of metal. These pieces are referred to as coupons. The welds can be on one coupon that is about 4 inches x 4 inches or on individual coupons that are about 2 inches x 4 inches and ¼ inch thick. Suggested rods for this class of position welds for AC and DC straight or reverse polarity is, first E-6013, second E-7014 and E-6010 for DC reverse polarity only.
 2. Welds should be cleaned with a chipping hammer and wire brush. Apply a coat of light oil (penetrating oil) to the metal to prevent rusting. Wipe off excess oil.
 3. 4-H Welding Project Tips and Suggestions: Class 3 & 4 1. All welds should be cleaned and protected from rust with paint or light oil. Plans are to be complete enough that if they were given to a welding shop, the item could be made without further instructions. Bill of materials should include a cost for all items used including steel, electrodes, paint, wheels, etc.
- H-920-003 **Welding Art** - (SF283) any art created using tack welds to hold the metal pieces together (examples include horseshoe projects). Type of welder, welder settings, all plans, plan alternations, and a bill for material must be attached to the article. Protect plans with a cover. If project is designed to be outside, it is required to have an appropriate outdoor finish.
- H920-004 **Welding Article** - (SF281) any shop article where welding is used in construction. 60% of the item must be completed by 4-H member and notes regarding laser welding or machine welding must be included. Type of welder, welder settings, all plans, plan alternations, and a bill for material must be attached to the article. Protect plans with a cover. If a project is designed to be outside, it is required to have an appropriate outdoor finish because the project may be displayed outside.

- H-920-005 **Welding Furniture** – (SF282) – any furniture with 75% welding is used in the construction. 60% of the item must be completed by 4-H member and notes regarding laser welding or machine welding must be included. Type of welder, welder settings, all plans, plan alternations, and a bill for material must be attached to the article. Protect plans with a cover. If a project is designed to be outside, it is required to have an appropriate outdoor finish because project may be displayed outside.
- H-920-006 **Plasma Cutter/Welder Design** - (SF279) Plasma cutters/welders allowed for detailed design(s) to butt cut into metal. 4-H members will create a notebook describing the design process to create the "artwork" to butt cut into metal. In the notebook include:
- A photo (front and back) of the finished project.
 - Instructions on how the design was created (include software used), this allows for replication of the project.
 - Lessons learned or improvements to the project.
 - Steps to finish project.
- H-920-007 **Composite Weld Project** - (SF280) 60% of the project must be welded and 40% made from other materials such as wood, rubber, etc. Type of welder, welder settings, all plans, plan alternations, and a bill for material must be attached to the article. Protect plans with a cover. If project is designed to be outside, it is required to have an appropriate outdoor finish because project may be displayed outside-State Fair).

Each specialty display should include names of the insects, interesting information about them, and why the display was made. Advanced identification collections should have insects grouped with labels that correspond with identification level (e.g. family, genus, species). A specialty collection may consist of insects by taxonomic group (e.g. butterflies, grasshoppers, dragonflies, scarab beetles) or by host, subject, or habitat (e.g. insect pests of corn, aquatic insects, insect mimicry, insects galls, insect from goldenrod, insect pollinators. etc.).
- H-800-005 **Insect Habitats** - (SF188) - Habitats consist of any hand-crafted objects, made of natural or artificial materials, to be placed outdoors, which promote or conserve insects in the environment. Insects may include bee pollinators, butterflies, beneficial insects, etc. A one-page report describing activities must accompany the exhibit. Report should include placement, target insect, why materials were chosen, functional design, and indicators of success. See the following resources for reports:

Department H – Veterinary Science

Pay Category #4

The purpose of a Veterinary Science exhibit is to inform the public about the common health problems of animals, a veterinary science principle or public health/zoonotic diseases.

1. **A Veterinary Science exhibit** may consist of a poster, notebook or a display. The exhibit may represent material from any of the Veterinary Science projects including entry level exhibits from Unit I.
2. If photographs are to be part of the exhibit, remember that they will be viewed by the public. Make sure that the photographs are in good taste and will not be offensive to anyone. Graphic photographs of excessive bleeding, trauma or painful procedures are not appropriate. For exhibits related to veterinary surgical procedures, aseptic techniques need to be shown, for example, use of drapes, use of sterile procedures, wearing of gloves and other appropriate veterinary medical practices.
3. **First-Aid Kits:** Because of public safety concerns and risk of theft of first-aid kit contents (veterinary drugs/equipment) with perceived potential for drug abuse, animal first aid kits containing any drugs or medications will be immediately disqualified and not displayed. First Aid kits wishing to include medication information should instead utilize written descriptions, photographs, drawings, computer generated print-outs or empty packaging of pharmaceuticals.
4. **Veterinary Science Posters** - This exhibit presents the viewer with a design that is simple and direct, unlike a display that usually presents more information. A poster should not exceed 22 inches x 28 inches and may be either vertical or horizontal.
5. **Veterinary Science Displays** - A display may include but is not limited to: a three-dimensional exhibit, a scale model, the actual product (for example: skeleton; teeth; samples of leather, fur, or dried skin damaged by disease or parasites) or a notebook. A display is not a poster. A display may be mounted on poster board not to exceed 22 inches x 28 inches or on 1/4 inch plywood or equivalent that does not exceed 24 inches high or 32 inches wide or in a three-ring binder or another bound notebook format.
